The HKU Foundation supports the University’s advancement and furthers its mission. As a benefactors’ circle, the Foundation has grown to 3,000 members since its establishment in 1995.

Over the past two decades, HKU has been endowed with gifts big and small from over 50,000 alumni and friends, totaling HK$11 billion. A total of HK$650 million has been disbursed through annual Seed Grant exercises in support of various initiatives, majority going towards scholarships and has benefitted over 15,000 students.

A Son’s Gift to Honour his Parents

In loving memory of his parents, Dr and Mrs Bau Tsu-zung, Dr Maurice Bau left a HK$100 million bequest to establish the Bau Tsu Zung Bau Kwan Yeu Hing Scholarships.

The late Dr Bau Tsu-zung was an alumnus of HKU, having graduated from the Medical Faculty in 1927 and received a Doctor of Medicine in 1932, thus starting the family’s connection to the University. The Scholarships will benefit deserving undergraduate and postgraduate medical students.

In recognition of this generous gift, the Institute of Medical and Health Sciences Education, which was established in 2004, has been named the Bau Institute of Medical and Health Sciences Education.

Alumni Family Shares Legacy of Education

HK$1 million was donated from the estates of the late Mr and Mrs Yang to establish the Yang Tuck Ming & Wong Fung Ying Service Learning Fund.

Despite being blue-collar workers who received little schooling, Mr and Mrs Yang ensured their children had the best opportunities for higher education. The family is also closely tied to HKU, as over the last four decades, nine of its members chose to study here.

It is hoped that the Fund will encourage students to participate in service learning and engage in addressing local and global concerns.
Transformational Gift with Deep Roots

Dr the Hon Li Dak-sum 李達三, a renowned businessman and philanthropist, donated three leadership gifts to The University of Hong Kong, The Chinese University of Hong Kong, and The Hong Kong University of Science and Technology. Each HK$100 million gift has been used to set up a Li Dak Sum Yip Yio Chin Kenneth Li Scholarship 李達三葉耀珍伉儷李本俊獎學金 at the three universities to support outstanding local students who are graduates of Ning Po College or Ning Po No. 2 College.

It is Dr Li’s conviction that “education is the foundation of a strong country”, and therefore, over the years, he has devoted much of his resources to education. President Peter Mathieson thanked Dr Li sincerely, “we applaud Dr Li’s long-term vision of supporting education. It is with this support that HKU continues to thrive and contribute to the advancement of education for the betterment of society.”

Advancing Promising New Cancer Treatments

The Medical Oncology Drug Discovery and Development Program (Drug Development Program) was established last year at the Department of Medicine through a HK$10 million donation from the New World Group Charity Foundation.

“The establishment of the Drug Development Program will be in line with the strategic development in health and technology advocated by the Hong Kong Government. We shall focus on the development of cancer medicine as different kind of cancers take away many lives every year. We believe that with our expertise in this aspect, more novel drugs can be discovered to help cancer patients worldwide,” said Professor Karen Lam, Head of Department of Medicine in the Li Ka Shing Faculty of Medicine.
The “Growing Partners” project was initiated by a group of Class of 1980 alumni in 2005, aiming to enrich the development of teenagers through one-on-one partnership with HKU alumni. The target youth are from the age group of 12 to 15, all coming from financially challenging families. Empirical evidence shows that this group of teenagers is most vulnerable with low self-esteem. Apart from mentoring, the project also provides enrichment activities to enhance the teenagers’ social exposure and to build up their resilience towards life challenges.
Bridging Gaps
Opening Avenues

To better address the needs of students with Autism Spectrum Disorder (ASD, 自閉症譜系障礙) in Hong Kong’s mainstream primary and secondary schools, the Hong Kong Jockey Club Charities Trust earmarked HK$167 million to pioneer a three-year programme, entitled “JC A-Connect: Jockey Club Autism Support Network” 「賽馬會喜伴同行計劃」, in collaboration with the HKU Faculty of Social Sciences, the Education Bureau, and six NGOs.

Following the launch ceremony last year, a wide range of activities have been organised to achieve the programme’s objectives. The programme delivers over 2,600 school-based group training programmes to students in more than 300 primary and secondary schools, covering more than 50% of the estimated population of targeted students. Education and assistance for their parents will be also provided through 18 satellites centres / parent resource centers and other educational programmes.
A Milestone of 88

‘Each of these gifts came with a story, and a dream’
The Ninth Inauguration of Endowed Professorships was held on April 15, 2016. Eight new Professorships in the Faculties of Architecture, Education and Medicine as well as a Distinguished Visiting Professorship in the Humanities and Social Sciences were established.

A total of 88 Endowed Professorships have been established since 2005.

All of the Professors recognised their role as torch bearers for those that come after them.

**Hung Leung Hau Ling Distinguished Visiting Professorship in the Humanities and Social Sciences**

孔梁巧玲傑出客座教授席 人文及社會科學

This endowment will support the appointments of visiting scholars in the fields of the humanities and social sciences.

“The Hung Family believes that in this age of innovation Hong Kong needs creative minds with humanistic sensibilities to chart a cosmopolitan, multi-cultural future. In setting up the Hung Leung Hau Ling Distinguished Visiting Professorship, the family hopes to bring leading academics with inter-disciplinary vigour to The University of Hong Kong to help nurture and inspire the next generation of young scholars towards this cherished vision.”
