Distinguished Science Alumni

The Faculty of Science always regards its alumni the most important asset. Not only the unstinting support of alumni it treasures, but also their commitment and endeavours in contributing to society. On the occasion of its Platinum Jubilee, the Faculty is proud to honour its outstanding graduates from achievements in their own profession; scientific research and science education; and contributions to the community and society. While paying tribute to the 43 Distinguished Alumni, the Faculty also hopes its students and future generations will be enlightened and learn from these role models – their devotion to their professions, their strong leadership and the attitude of giving.
