## Distinguished Talk and Dinner

### “Land Creation – Topside Development of Kwai Tsing Container Terminals”

By Ir Dr. Joseph Chow & Ir Professor C K Mak

With overwhelming response from the previous Distinguished Talk and Dinner held in April and November 2017 respectively, HKUEAA is going to arrange the third talk in June. This time, we are honoured to have Ir Dr. Joseph Chow – the Founding and Honorary Life President of HKUEAA and Ir Professor CK Mak, the Founding Secretary and Special Advisor of HKUEAA, to share with us on the topic “Land Creation – Topside Development of Kwai Tsing Container Terminals”, followed by an exquisite dinner.

#### Distinguished Speakers

Ir Dr. Joseph Chow is a profession civil engineer. He graduated in 1964 and worked in various consultants and companies including Scott Wilson Kirkpatrick & Partners, Hongkong Electric Company, Hsin Chong, Shui On, and Freeman Fox. He started his own consultancy, JMK in 1992 and retired in 2001 and is now its Chairman Emeritus. Dr. Chow was very active in public service and was Chairman of the ERB, President of the HKIE, Chairman of HK Construction Workers Registration Authority, Chairman of the HK Country Club and President of the Rotary Club of HK Island West.

Ir Professor CK Mak joined the HK Government after graduating from the University of Hong Kong in 1973. During his 37 years of service, he served as Head of the Railway Development Office, Project Manager in the Territory Development Department, Director of Highways and Permanent Secretary for Development in charge of the Government’s work policies and resource management for the public works programme. Since the early 1980’s, he has taken up teaching assignments in the universities in Hong Kong. His passion is to build and strengthen the bonds between students, young engineers and the more experienced seniors through teaching and interaction, experience sharing, mentoring and experiential learning ventures.

## Synopsis

In 2017, in response to the critical shortage of land in Hong Kong, contributing to run-away property prices, Ir Dr. Joseph Chow proposed to adopt 1-Land-2-Uses (一地兩用) and put private and public residential developments as well as community and commercial buildings on top of a podium covering the container storage yards. This concept is similar to building on top of railway stations, depots, bus terminals, transport interchanges all of which HK already has a lot of experience. The talk discusses the pros and cons of the concept.

## Exquisite Dinner

Queen's College Old Boys' Association is a renowned Clubhouse famous for its delicious Chinese dishes with top rating in Openrice. (<https://s.openrice.com/OrbS0Cue000>)
