When you join Dow Jones, you become part of the most dynamic, creative and savvy news and information companies in the world. As a global leader in news and business intelligence, we're newswires, websites, newspapers, apps, newsletters, databases, magazines, radio and television--including some of the widest-read and most-respected brands, like The Wall Street Journal, Barron's and MarketWatch, our flagship news and analytics platform. Our media inform the discussions and decisions that are vital to the world's commerce, while our databases make the business world more transparent. We continually develop technology to transform information into insight and prosperity. From over 50 countries and in over a dozen languages, we enlighten and inspire audiences with authoritative, differentiated and trusted content.

We are now seeking a high caliber candidate to fill the following vacancy in Hong Kong/ Singapore.

Dow Jones is collaborating with News Corp and we are looking for a Senior Backend DevOps Engineer to join our innovative technology department. This role will be expected collaborate with our team leads and cross-functional businesses to create and deploy native Android applications.

News Corp has a global platform that already powers 14+ apps and we are adding more. This role will have the opportunity to influence products across different industries. This role will also be involved in open source projects to showcase their own passions and involvement in technology.

Key Responsibilities:
- Design and develop the automation to build our AWS based server side infrastructure
- Design and develop the automation for our Ci/CD pipeline
- Research and suggest new products, applications and protocols
- Stay up-to-date with new technology trends

Qualifications:
- 3+ years DevOps scripting experience using Python or similar scripting language
- 3+ years AWS infrastructure working experience including the usage of VPC, EC2, S3, ELB, ECR, Lambda, API Gateway, Route 53, ElastiCache
- 3+ years working with container based technologies including the usage of Docker, EKS, ECS
- 1+ years working with Kubernetes and Kubernetes scripting using KOPS or similar technology
- 1+ years AWS Cloudformation or Terraform programming experience
- 3+ years experience building Ci/CD pipeline using Jenkins, CircleCI, CodeBuild, CodePipeline
- 3+ years GitHub experience
- Experience using Jenkins is a plus

The ideal candidate is:
- Passionate about your work with a desire to problem-solve
- Comfortable working across a broad range of technologies
- Positive attitude, willing to learn and take on challenges
- Desire to take ownership and technical leadership skills

Dow Jones offers an opportunity to work for one of the world's leading financial and business news companies. We invite interested candidates to submit a cover letter and detailed resume, current and expected salary.
