

# SEEKING TALENTED MECHANICAL ENGINEER FOR ROLE IN HK STARTUP.

Spidfier (Nanopath Technologies) is looking for a qualified engineer to lead the production of our proprietary hardware.

Spidfier is a deep technology startup based out of Hong Kong Science and Technology Park that is using DNA sequencing to identify fish products. Our aim is to provide a quick, easy and cheap identification solution for industry players to accurately access their products. Through our efforts we hope to eradicate fish fraud and promote seafood sustainability.

Qualifications needed:

- HKU (or other Hong Kong based University) Bachelors Degree or better in Engineering field, preferably mechanical engineering.
- Experience in Rapid prototyping using a 3D Printer.
- Entrepreneurial and managerial spirit, with no prior experience required but drive to create is important.
- Based in Hong Kong and can legally work within Hong Kong SAR, freshgrad 1-year grace period is ok.

Remuneration:

- Salary of 18,000HKD per month with MPF. Potentially greater depending on Education level.
- Flexible work hours with unlimited holiday leave pending work completion
- Contract based employment
- Possibility of shares in company pending performance
- Aid in applying for Work Visa
- Workspace within Hong Kong Science and Technology Park

The ideal candidate is a self-starter with an interest in conservation. We are a laid-back and tight knit team that are looking not only for the right person to spearhead hardware development, but someone who will also grow into a key member of our family.
